Supplement to

Journal of MARINE RESEARCH

INDEX

Volume 70, Numbers 1–6, 2012

Sears Foundation for Marine Research *Yale University*

ALPHABETICAL INDEX BY AUTHOR'S NAME

Anderson, Thomas R. and Wendy C. Gentleman: The legacy of Gordon Arthur Riley (1911–1985) and the development of mathematical models in biological oceanography. *1.*

Andres, Magdalena; Jiayan Yang and Young-Oh Kwon: Adjustment of a wind-driven two-layer system with mid-basin topography. *851.*

Bernard, Guillaume; Antoine Grémare; Olivier Marie; Pascal Lecroart; Filip J.R. Meysman; Aurélie Ciutat; Bruno Deflandre and Jean Claude Duchêne: Experimental assessment of particle mixing fingerprints in the deposit-feeding bivalve *Abra alba* (Wood). *689.*

Brink, K.H.: Baroclinic instability of an idealized tidal mixing front. *661.*

Bushek, David; Susan E. Ford and Iris Burt: Long-term patterns of an estuarine pathogen along a salinity gradient. *225.*

Faure, Vincent and Kevin Speer: Deep Circulation in the Eastern South Pacific Ocean. *748.*

Ford, Susan E. and David Bushek: Development of resistance to an introduced marine pathogen by a native host. *205.*

Ford, Susan E.; Emily Scarpa and David Bushek: Spatial and temporal variability of disease refuges in an estuary: Implications for the development of resistance. *253.*

Gandhi, Naveen; R. Ramesh; S. Prakash; Sharon Noronha and N. Anilkumar: Primary and new production in the thermocline ridge region of the southern Indian Ocean during the summer monsoon. *779.*

Greene, Andrew D.; Randolph Watts; Georgi G. Sutyrin and Hideharu Sasaki: Evidence of Vertical Coupling between the Kuroshio Extension and Topographically Controlled Deep Eddies. *719.*

Haney, S.; S. Bachman; B. Cooper; S. Kupper; K. McCaffrey; L. Van Roekel; S. Stevenson; B. Fox-Kemper and R. Ferrari: Hurricane wake restratification rates of one-, two- and three-dimensional processes. *824.*

He, Yan; Susan E. Ford; David Bushek; Eric N. Powell; Zhenmin Bao and Ximing Guo: Effective population sizes of eastern oyster *Crassostrea virginica* (Gmelin) populations in Delaware Bay, USA. *357.*

Hofmann, Eileen, E. and Susan E. Ford: An introduction to Ecology of Infectious Diseases - Oysters and Estuaries. *i.*

Isachen, Pål Erik and Ole Anders Nøst: The air-sea transformation and residual overturning circulation within the Nordic Seas. *31.*

Jia, Yan and Alexander Yankovsky: The impact of ambient stratification on freshwater transport in a river plume. *69.*

Klocker, Andreas; Raffaele Ferrari; Joseph H. LaCasce and Sophia T. Merrifield: Reconciling float-based and tracer-based estimates of lateral diffusivities. *569.*

Munroe, Daphne M.; John M. Klinck; Eileen E. Hofmann and Eric. N. Powell: The role of larval dispersal in metapopulation gene flow: Local population dynamics matter. *441.*

Narváez, Diego A.; John M. Klinck; Eric N. Powell; Eileen E. Hofmann; John Wilkin and Dale B. Haidvogel: Circulation and behavior controls on dispersal of eastern oyster (*Crassostrea virginica*) larvae in Delaware Bay. *411.*

Narváez, Diego A.; John M. Klinck; Eric N. Powell; Eileen E. Hofmann; John Wilkin and Dale B. Haidvogel: Modeling the dispersal of eastern oysters (*Crassostrea virginica*) larvae in Delaware Bay. *381.*

Powell, Eric N.; John M. Klinck; Kathryn Ashton-Alcox; Eileen E. Hofmann and Jason M. Morson: The rise and fall of *Crassostrea virginica* oyster reefs: The role of disease and fishing in their demise and a vignette on their management. *505.*

Powell, Eric N.; John M. Klinck; Ximing Guo; Eileen E. Hofmann; Susan E. Ford and David Bushek: Can oysters *Crassostrea virginica* develop resistance to dermo disease in the field: The impediment posed by climate cycles. *309*.

Powell, Eric. N.; Danielle A. Kreeger; Jason M. Morson; Dale B. Haidvogel; Zhiren Wang; Roger Thomas and Jennifer E. Gius: Oyster food supply in Delaware Bay: Estimation from a hydrodynamic model and interaction with the oyster population. *469*.

Rabe, Berit; Helen L. Johnson; Andreas Münchow and Humfrey Melling: Geostrophic ocean currents and freshwater fluxes across the Canadian polar shelf via Nares Strait. *603*.

Reid, Joseph L.: Deep circulation within the Argentine Basin. *199*.

Smyth, W.D. and S.A. Thorpe: Glider measurements of overturning in a Kelvin-Helmholtz billow train. *119*.

Stachelhaus, Scott L.; S. Bradley Moran; David S. Ullman and Roger P. Kelly: Cross-shelf mixing and mid-shelf front dynamics in Mid-Atlantic Bight evaluated using the radium quartet. *141*.

Thorpe, S.A.: Measuring overturns with gliders. *93*.

Veronis, George: A Tribute to Doreen Orciari. *559*.

Van Haren, Hans and Louis Gostiaux: Detailed internal wave mixing above a deep-ocean slope. *173*.

Volkenborn, Nils; Christof Meile; Lubos Polerecky; Conrad A. Pilditch; Alf Norkko; Joanna Norkko; Judi E. Hewitt; Simon F. Thrush; David S. Wethey and Sarah A. Woodin: Intermittent biorrigation and oxygen dynamics in permeable sedicments: An experimental and modeling study of three tellinid bivalves. *794*.

Wang, Zhiren; Dale B. Haidvogel; David Bushek; Susan E. Ford; Eileen E. Hofmann,; Eric N. Powell and John Wilkin: Circulation and water properties and their relationship to the oyster disease MSX in Delaware Bay. *279*.

Wells, Judith, R.; Jonathan P. Fram and Geno Pawlak: Solar warming of near-bottom water over a fringing reef. *641*.

The Journal of Marine Research is part of the Sears Foundation for Marine Research, founded in 1937 by A. E. Parr as a result of a gift to Yale University by Henry Sears. The Sears Foundation for Marine Research Fund is administered by Yale University as part of its nonprofit operation. Income is used solely for the purpose of publishing and improving the quality of the Journal for the benefit of its readers.
